IT TECHNOLOGY GRANT FUNDING

There are a number of charitable foundations that make IT technology grant funding available for tech 4 good and projects and equipment, such as laptops.

Access Foundation - Tech Grant Funding For The Disadvantaged & Vulnerable

They offer grants of between £20k to £100K to UK charities and social enterprises focused on changing people's lives by helping them bridge the digital divide. They want to enable vulnerable and disadvantaged people to get access to the education, facilities and resources they need to engage with the digital world and open up the opportunities for better employment, mental health and reduced isolation which that brings.

If your organisation is trying to help in this way, they'd be delighted to receive an application. They are particularly interested in areas, which feature highly on the deprivation index, but are also organisations which aim to bridge the digital divide for people disadvantaged in other ways (such as mental or physical disability).

They fund discrete projects or activities where the beneficial impact can be measured in clear quantitative and qualitative terms. There is further information and an on-line application on their [website](#).
